Log-in for the First time or After password reset…

1. **DO NOT CLICK** the LOGIN button!
2. **Click on** the CHANGE link, as seen in the image to the right.
3. Enter your username: Use your Student ID number with a capital “T” in the TCC ID section.
4. **Password:**
   - **Default Password** (first time students will use their 6 digit birthday {mmddyy})
   - **Password Resets:** use the temporary password you have been given.
5. You may have a pop up box that says “Click Here”. You MUST create 3 security questions in case you forget your password in the future.
6. Change your password.
   - You will now enter your Temporary Password in the “Old Password” section. After that you will create your new password in the “New Password” section.
   - The new password must be at least 6 characters or more and can not be a password you have used before. If your new password isn’t accepted, you must create a different one. (HINT: Try using at least one Capitalized letter and at least one number.)
7. If you did not get the pop up box earlier, click on “MYTCC Password Manager Registration” after creating your new password to set up 3 security questions.

**Once steps 1-7 are completed, you may login to MYTCC with your new password.**
