RISC SURVEY OVERVIEW

01

SURVEY DESCRIPTION

The Revealing Institutional Strengths and Challenges (RISC) Survey provides detailed, actionable data about student success, using the latest advances in survey research and technology. Survey results pinpoint where students are experiencing obstacles and identify campus offices that excel in helping students succeed in college. The survey has three main sections.

The survey first asks students about facing challenges during the current semester in five broad areas: academic support services, campus environment, finances and financial aid, succeeding in their courses, and work and personal issues. Each section has multiple challenges, with over 80 unique challenges to student success across the five areas, such as errors with financial aid paperwork, not being told to take a course necessary for their degree, or difficulty using course technology in online classes.

Next, the survey asks students about their interactions with campus offices. Our research indicates that students want office staff who are accessible, concerned about helping them, and able to effectively solve their problem. Students describe five campus offices on these three dimensions; TCC chose the specific offices that appeared in the survey. The survey used office names specific to TCC, so that students saw office names they recognized.

Finally, students provide their overall perceptions of the college. Students are asked if they would recommend the college to a friend, whether the college is a good value, and how well the college is helping them meet their enrollment goals, such as improving job and career opportunities or preparing for a four-year degree.

Students are also given two open-response questions, where they could write out an answer: what is TCC's greatest strength, and if TCC could change one thing to increase student success, what should it change? See your college contact for the written responses to these two questions.

The survey concludes with a section asking about student demographic information.

Interactive and printable versions of the survey can be found at:

SURVEY ADMINISTRATION

The survey was administered in Fall 2022 to 11,783 TCC students. There were 1,525 responses used in this report, for a 12.9% response rate. Median time TCC students spent taking the survey was 8.1 minutes.

The table below provides some background information about your college's benchmark sample. Fifty-seven other community colleges participating in the survey during the past two years are used for the benchmark numbers in this report; each college is weighted equally when calculating benchmarks. Your benchmark sample has a total of 42,273 respondents.

CHALLENGES TO STUDENT SUCCESS

MAIN CHALLENGE AREAS

The RISC survey contains over 80 unique challenges that students face during college, and students can indicate they faced more than one challenge. The specific challenges are divided into five main areas:

- ▶ Academic support services
- ▶ Campus environment
- ▶ Finances and financial aid
- ▶ Success in courses
- ▶ Work and personal

The survey begins by asking students if they faced challenges in each of these these areas, and then asks about more specific challenges, depending on how students initially respond. The challenge order is randomly assigned for each respondent.

For example, students are asked:

Think about your finances and financial aid. Have you had any challenges in the following areas?

	Yes	No
Paying college and living expenses	<input type="radio"/>	<input type="radio"/>
Working with financial aid office	<input type="radio"/>	<input type="radio"/>
Military and employer tuition benefits	<input type="radio"/>	<input type="radio"/>

Students choosing “yes” to one or more of these response options are coded as having a challenge with finances and financial aid.

Table 2.1 provides an overview of the main challenges students faced at TCC in Fall 2022 in the five main areas. *Work and personal issues* is the area where your students most frequently reported having challenges, with 66% reporting one or more challenges in this area.

A negative number in the *Diff.* column indicates a lower proportion of students at your institution reported challenges in an area, compared to the benchmarking group. These are presented graphically with green bars. Positive numbers indicate a greater proportion of your students are reporting challenges, and are presented with red bars.

Table 2.1 Major challenges to student success

	TCC % ○	Bench. % ■	Diff.	<i>n</i>
Work and personal issues	66	60	+6	1,013
Success in courses	54	55	-1	819
Finances and financial aid	44	37	+7	664
Academic support services	34	33	+1	523
Campus environment	18	21	-3	278

Notes

Green indicates that TCC has a lower proportion of students reporting a challenge compared to the benchmark sample proportion; red indicates TCC has a higher proportion. Bold indicates a statistically significant difference from the benchmark sample (two-sample test of proportions, $p < .05$). Percentages do not sum to 100 because students could choose multiple challenges across the five topic areas. *n* in table row is the number of students choosing a challenge in that area at your college; overall sample $n=1,525$.

Tables 2.2 to 2.6 provide more detail about student challenges. For example, if a student answered “yes” to “Paying college and living expenses”, they were prompted with a follow-up question:

Where did you have issues paying expenses? Please check all that apply.

- Tuition and fees
- Paying college and living expenses
- Living expenses (housing, food, healthcare)
- Childcare
- None of the above

To help uncover where your students are facing challenges, we rank the major categories of challenges in descending order. We then rank the more specific challenges within each major category in descending order.

For example, 66% of your students chose one or more challenges in the major category of *Work and personal issues*. The most common subcategory was *Work*, with 44% choosing challenges in this subcategory. The most common specific challenge within the *Work* subcategory was *Work hours do not leave me enough time to study*, with 27% of your students mentioning this as a challenge to their success. All percentages in these tables are calculated as the percentage of the entire respondent sample.

STUDENT-OFFICE INTERACTIONS

Table 3.1 shows the administrative support units your college chose for the RISC Survey. Unit names appeared on the survey exactly as they are listed in this report. Academic Advising was the most commonly used office, with 82% reporting using the office during the Fall 2022 semester, followed by The Bookstore (55%) and Student Life (28%).

Table 3.1 Office usage

	TCC %	Bench. %	Diff.	n

The Bookstore	55	60	-5	839
Student Life	28	14	+14	425
The Bursar	23	22	+1	354
Career Services	12			189

If students indicated they interacted with an office during the semester, they were asked three questions about their interactions with staff:

How available were [unit name] staff when you interacted with them?

- Very available
- Somewhat available
- Somewhat unavailable
- Very unavailable

How concerned were [unit name] staff about addressing your issue?

- Very concerned
- Somewhat concerned
- Somewhat unconcerned
- Very unconcerned

How effective were [unit name] staff when addressing your issue?

- Very effective
- Somewhat effective
- Somewhat ineffective
- Very ineffective

Results are presented in Table 3.2, which shows the percentage of respondents choosing the top category (*very available/concerned/effective*). Because each college chose the administrative offices for this set of questions, the table only presents benchmarks comparisons for an administrative office when at least five other colleges surveyed students about the same type of office.

Notes

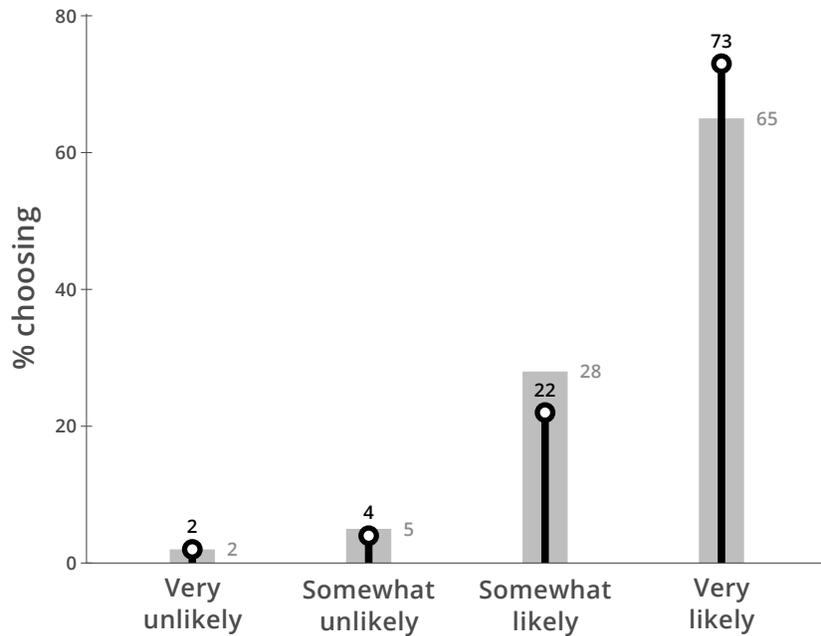

Percentage is the proportion of students rating an office in the top response category (*very available/concerned/effective*). Green indicates that TCC has a higher proportion of students choosing the category compared to the benchmark sample proportion; red indicates TCC has a lower proportion. Bold indicates a statistically significant difference from the benchmark sample (two-sample test of proportions, $p < .05$). *n* in table row is the total number of students at your college rating an office on that dimension; i.e., the denominator for the row percentage.

STUDENT VIEWS OF THE INSTITUTION

Besides challenges and office interactions, students were asked several questions about TCC overall.

The first question, “Based on your experiences, how likely are you to recommend TCC to a friend?”, is a summative measure of how students view your institution. Results are presented in Figure 4.1, with TCC represented by the black line and the benchmark sample by the gray line. 95% of your students would be somewhat or very likely to recommend TCC. The TCC distribution of responses is statistically significantly different from the benchmark sample.

Figure 4.1 Would student recommend TCC to a friend?

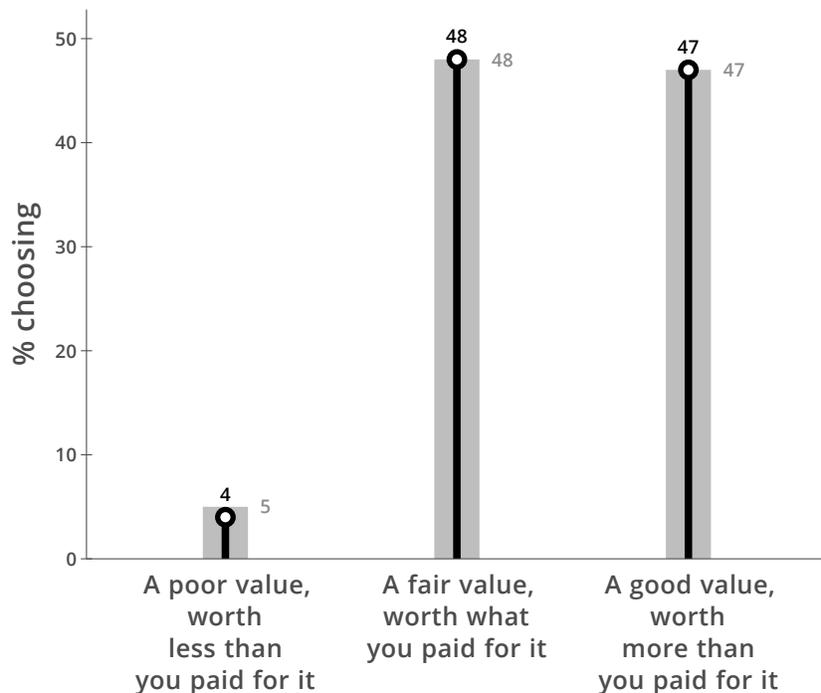

Notes

TCC is the black bar; benchmark sample is gray. $\chi^2 = 23.6, p < .01; n = 1508.$

Next, students were asked to rate the overall value of their education at TCC (see Figure 4.2). 95% of your students believe their education is worth what they paid (or even worth more). The TCC distribution of responses is not statistically significantly different from the benchmark sample.

Figure 4.2 Overall value of education?

Notes

TCC is the black bar; benchmark sample is gray. $\chi^2 = 5.8, p < .06; n = 1501$.

The last set of questions asks students how well your college is doing in preparing students for their educational goals. The top half of Table 4.1 lists students' responses to their primary reason for attending TCC. 51% chose *Prepare for a four-year degree* as their primary purpose for attending your institution.

Students were then asked how well TCC is helping them achieve the specific goal they chose. Students could choose from *very well*, *fairly well*, *somewhat*, or *not at all*. Responses from the top category are presented in the bottom half of Table 4.1. For example, 48% of the students who chose *Prepare for a four-year degree* as their primary goal indicated that TCC is doing *very well* in terms of preparing them for a four-year degree.

Table 4.1 How well is education helping accomplish goals

Notes

Top panel row percentage is the proportion of students choosing one of the three educational goals. Bottom panel row percentage is the proportion of students choosing *very well* in response to the preparation question for that goal. Bold indicates a statistically significant difference from the benchmark sample (two-sample test of proportions, $p < .05$). *n* in table row is the total number of students responding to the question; i.e., the denominator for the row percentage. Difference bars in the top panel of the table are in black, to reflect that schools may score high or low on these measures, depending on their institutional mission. In the bottom panel, green indicates that TCC has a higher proportion of students reporting that TCC is helping them achieve their educational goal compared to the benchmark sample; red indicates a lower proportion.
